

# Global Automotive Leaders Program

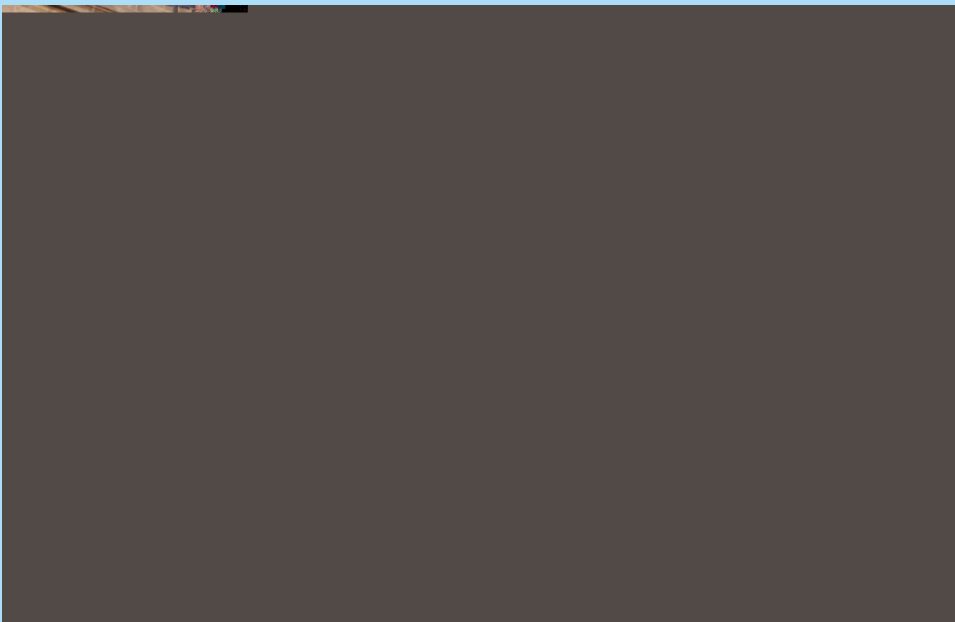

The **University of Detroit Mercy** and **Continental Teves** invite exceptional bilingual students (who are fluent in English plus Japanese, Mandarin Chinese, Romanian, or Spanish) to earn a Master of Engineering degree and work for a global industry leader, both in the USA and your home country.

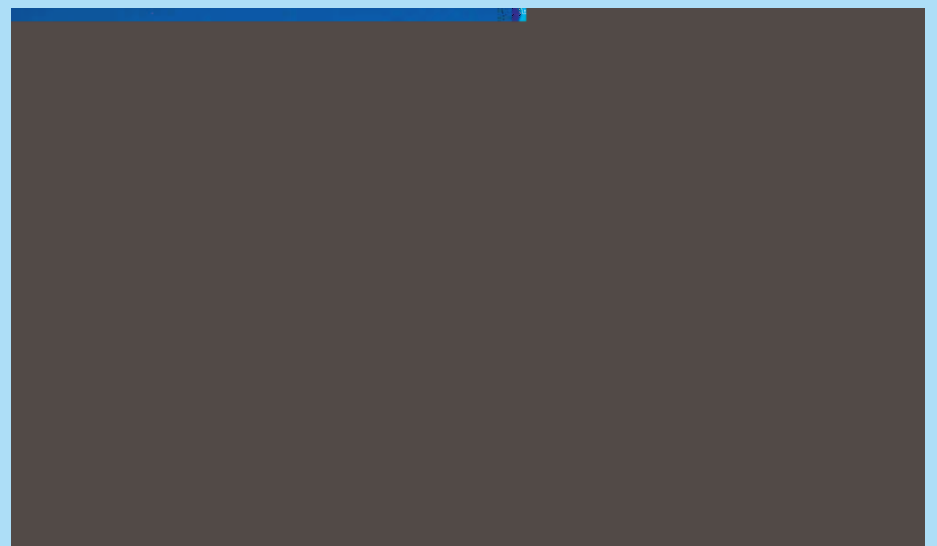

Earn a Master of Engineering Degree in either Mechanical or Electrical Engineering, and gain more than one year of engineering experience with pay.

**Scholarships, housing and transportation will be provided to students selected.**

The University of Detroit Mercy has three campuses with seven colleges, approximately 5,600 students and 60 academic fields. The College of Engineering and Science is located in a residential area of Detroit.

Continental Automotive Systems (CAS), is a leading manufacturer of hydraulic and electronic brakes, stability control and chassis, as well as electronic air suspension systems. CAS also specializes in electronics for engines, chassis, airbags, comfort electronics and more. CAS has over 18,000 employees in 32 facilities worldwide and posts sales in excess of five billion dollars (U.S.).
